Wings Reserve Loop Length

Disclaimer: These length were all determined in a controlled, air conditioned environment and can vary based on several factors including but not limited to: condition of canopy, experience of rigger, etc. Therefore, these are suggested lengths and can vary.

IMPORTANT: For models that have two grommets in the bottom of the reserve tray, ADD 1 ¼” to the numbers shown below.

TIP: The deeper and wider that you can get the “nest” the easier it will be to match the suggested loop lengths.

Canopy Size	Loop Length
