

Quick Reference For Sabre, & PDR ONLY

Sunrise Manufacturing does not guarantee the fit of canopies in a container due to varying climates, as all test packs were done in Florida. We only recommend getting two sizes of main and reserve for your container. There will be an "optimum" fit and a "soft" fit, with the "soft" fit being the downsized canopy suggested by Sunrise Manufacturing. Please call us regarding canopies and containers not listed on this chart as we have only listed our most common sizes of containers.
